Subject: RE: status of your RARE and RM project descriptions

Yes. That would be good.
Thanks!

Subject: status of your RARE and RM project descriptions

Hi Valois and Rick,

I wanted to let you know that I received some feedback from ORD on the two proposals you submitted. The feedback on the RM project: *Method to determine maximum post restoration contaminant concentrations in ISR wellfields to prevent breach of UIC Aquifer Exemption Boundary and protect downgradient USDWs at the Dewey-Burdock site using core data and reactive transport modeling*, was that it did not meet the requirements of a regional methods project and should be considered under the RARE program.

I wanted to check in with both of you and ask as to whether you wanted to have both of your projects reviewed for FY RARE funding consideration?

Thanks,
Patti
